

## Cloud Security Instructions

Use a free account at [draw.io](#) [links to an external site.](#) to diagram the entire cloud network that you created this week.

Your diagram should show the following:

- Azure resource group
- Virtual network with IP address range
- Subnet range
- Flow of specific traffic (e.g., HTTP, SSH)
- Security group blocking traffic
- Load balancer
- All VMs that you have launched including host names and IP addresses (internal and external where applicable)
- Where Docker and Ansible are deployed
